

## 2017 St Mary's Park Veg Beds Sowing, Planting and Harvesting

Always treat the chart as a guide - not instructions.

If it is particularly cold or wet, wait a while before sowing or planting.

Harvests too can be delayed or even speeded up by the weather, just need to check regularly.

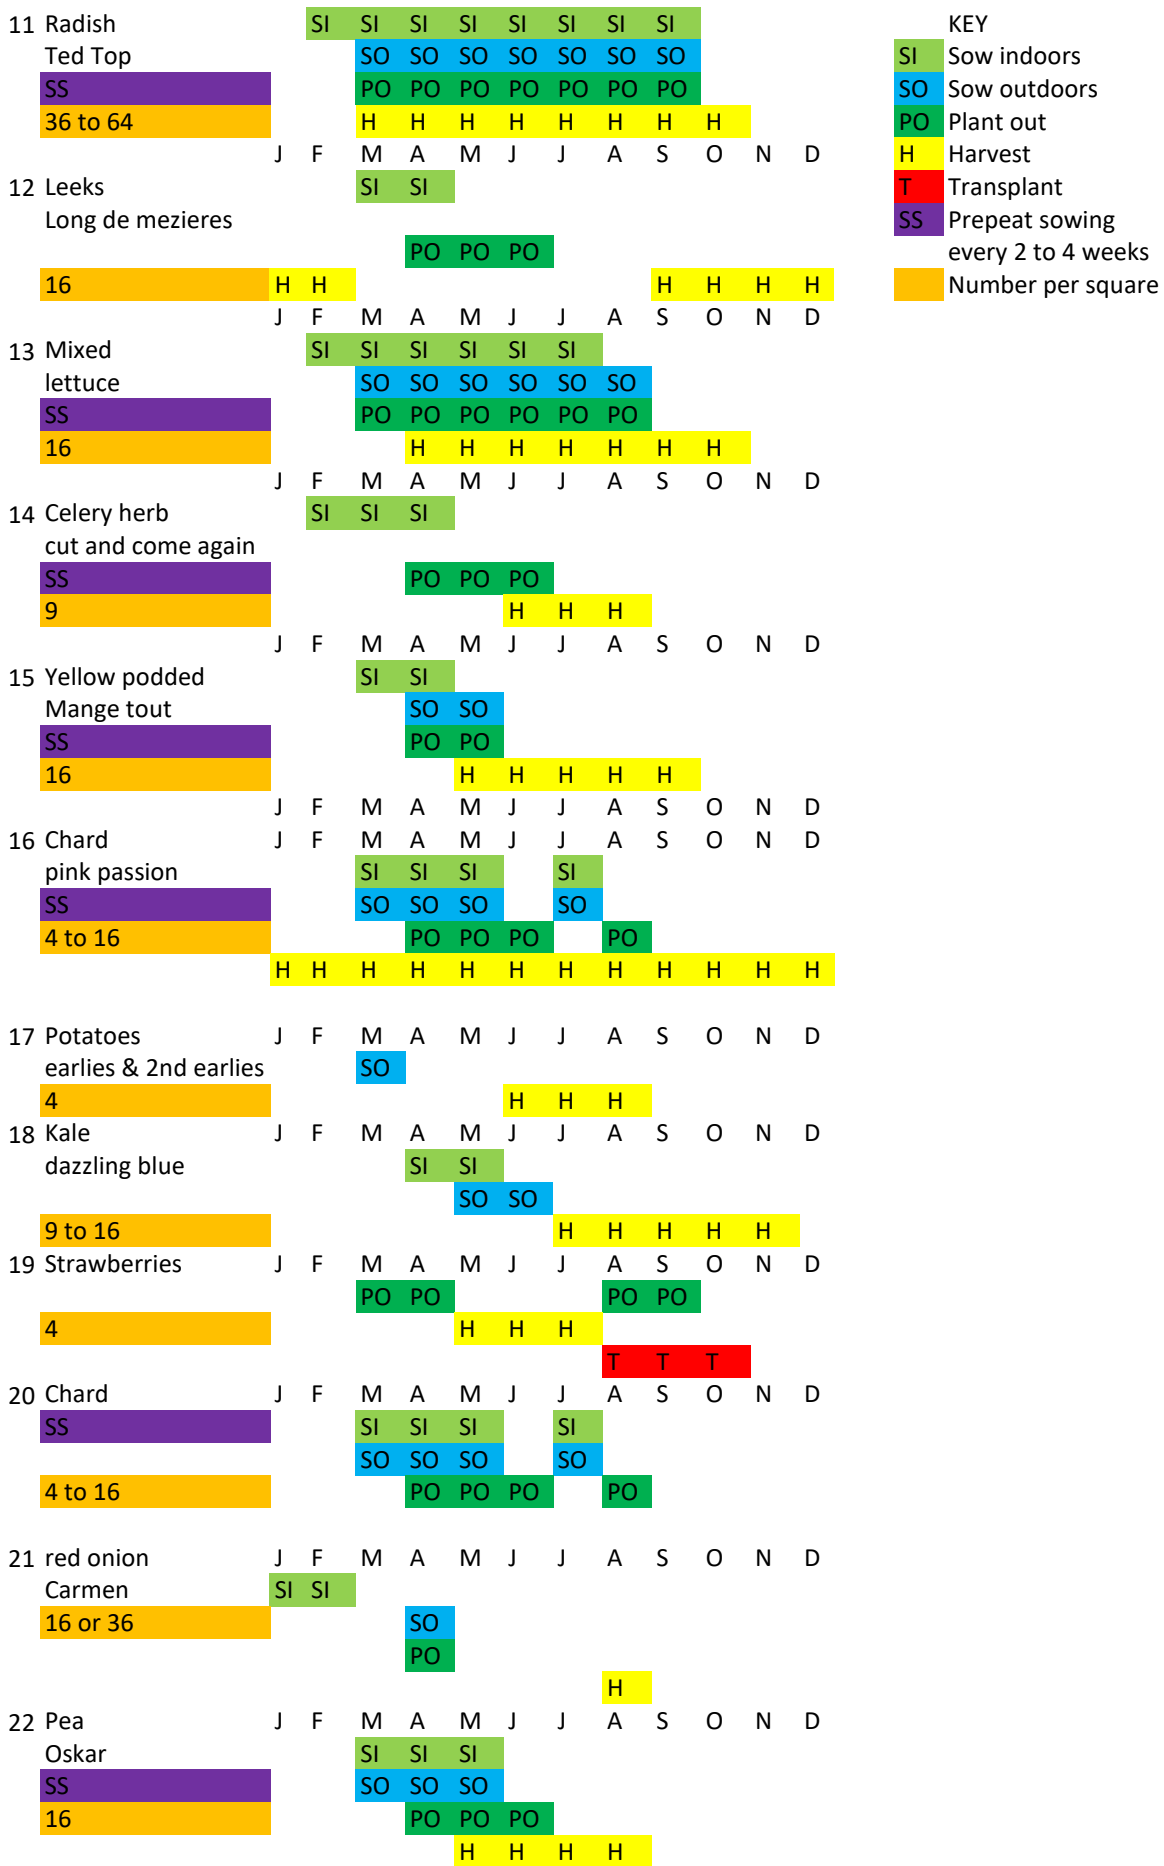

Sowing a few seeds every 2 to 4 weeks helps extend the harvest period.

**KEY**

- SI Sow indoors
- SO Sow outdoors
- PO Plant out
- H Harvest
- T Transplant
- SS Prepeat sowing every 2 to 4 weeks
- Number per square
